

HTT2W

Series

Control box

HTT2W controller is designed for Geming lifting columns and electric linear actuators to achieve 2 motors 100% synchronous working.

Product Applications

- 1. Industrial application
- 2. Medical application
- 3 furniture application
- 4 automotive applications

Features:

Through the enhanced circuit board function, this type of control system has 0.1W power pause Consumption.

Product function:

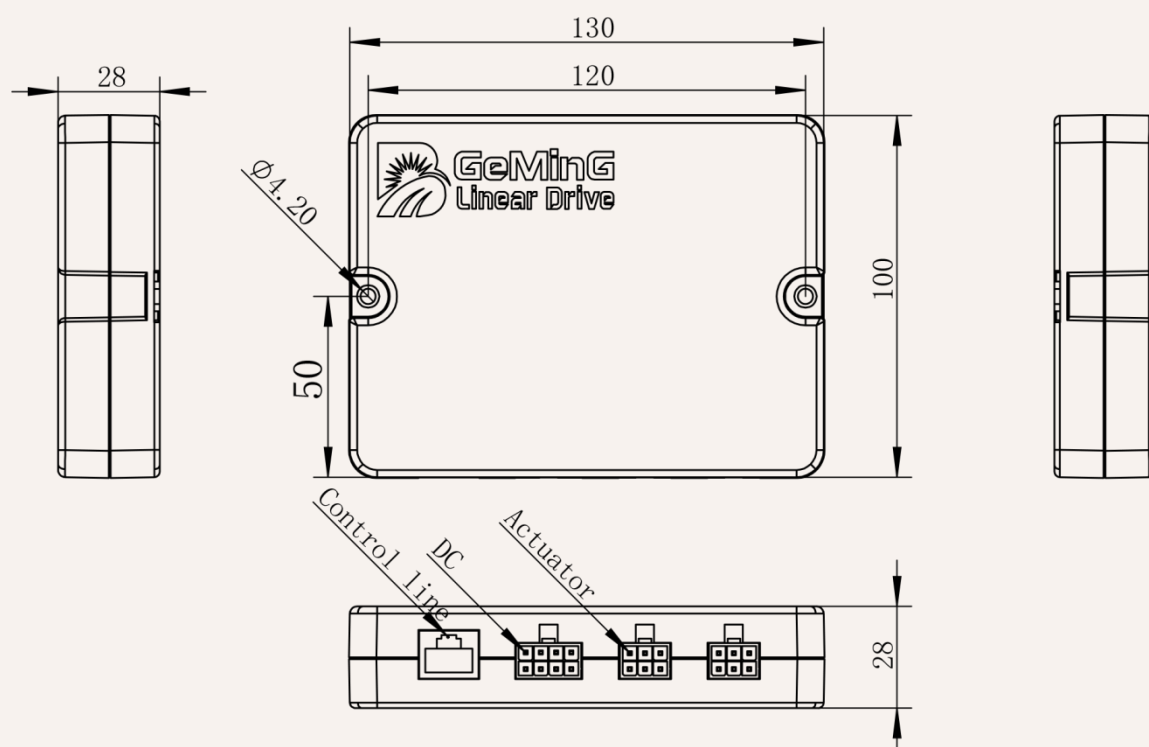

Refined controller	Transformer power: 120W, can maximize the function of the controller
Communication:	RS485 protocol, CANbus communication
Number of control motors:	2-way synchronization, hall encoder precise control, with car wireless remote control
Color:	black
Shell material:	Flame retardant ABS
Current limit:	Overprotection
Input voltage:	24V DC
Output voltage:	24V DC
Temperature range:	Ultra low residence temperature, in line with environmental standards
Protection grade:	IP54
Power cord:	Stripped 1 meter cable outlet. (if you need plug-in type for main power, please choose HTT2 model)
Mounting holes:	Yes
Handset options:	car wireless remote control; Home wireless remote control; Wired digital handset with memory function
